Pimples and Skin Eruptions Danger Signs of Bad Blood

It May Mean Eczema, Scrofula-The First Sign of Inherited Blood Disease

Pimples, scaly itching skin, rashes, burning sensations and Scrofula denote with unfalling certainty a debilitated, weakened and impure state of the blood. The trouble may have been in your blood from birth, but no matter how you were infected, you must treat it through the blood. It is a blood disease. You must use S. S. S., the standard blood tonic for 50 years, if you expect certain relief. For purifying the system, nothing is equal to it. The action of S. S. S. is to cleanse the blood. It soaks through the system direct to the seat of the trouble—acting as an antidote to neutralize the blood poisons. It revitalizes the red blood corpuscies, increases the flow so that the blood can properly perform its physical work. The dull sluggish feeling leaves you—the complexion clears up. Even long standing cases respond promptly. But you must take S. S. S. Drugs and substitutes won't do. Get S. S. S. from your druggist. If yours is a special case and you need expert advice, write to S. S. S. Co., Atlanta, Gs.

TEXAN "SOME" BEAR HUNTER

By United Press. EL PASO, Oct. 25.-Eighty eight

bears in seventeen years. That's the record of Tom O'Brien, champion bear hunter of the Black Range mountains, and he only hunts on Sundays.

He killed thirty-seven of these bears n the last eighteen months, using just thirty-seven shots. He doesn't believe n wasting time or ammunition.

"I read not long ago about a man who shot a bear 17 or 18 times," O'Brien told a group of visitors recently. "It's plumb disgusting. I don't think I'd find enough of a bear et. to shoot at," and he wasn't braz-

ging, either. O'Brien is a lumberman by profesdon and until recently owned a mili n the mountains near Santa Rita. out evidently he was born for a

"I've been bunting bear for seveneen years, ever since I've been in the Back Range mountains," continued O'Brien, "Somehow or other I just lke to get out in the woods on Sundays. I get up about 5 o'clock and strike out. I usually go about thirty miles from town, horseback. I ain't much on taking company with me. You see, I always feel safer by myself. Sometimes, when a man that's not used to hunting bear gets plumb scared when he sees one; his legs and arms get shaky and you don't always know which way he's liable to

"How many bears have you killed since you began hunting?" O'Brien was asked.

He hesitated, scratched his head peculatively, and said:

"Counting little 'uns and big 'uns, 've killed 88 in that time-17 years "But some of them was just cubs." e added apologetically. "The best 've ever done was the day before the Fourth of July, 1913. I killed three bears and captured one alive."

"What did you use-a machine gun?" came a rather sarcastic query.

"No, I was using a mauser then, ie answered "These machine guns (pump guns) are liable to jam, and a nan hasn't any use for a gun that's ammed when a bear is coming at him. 've tried almost every kind of a gun there is. Every time a new one comes out I buy it. I have a case full of hem, out I like that eight-millimeter mauser better than any other. J ion't usually have to shoot more than nce with it.

"I never shoot until I get a good hot. I don't care if he is coming toward me. I wait-till I get ready. Oh. es, sometimes I get ready in a hurry. But usually they'll give you time to break their necks. Always hit them in the neck. A grizzly always rears up to attack, and when he does, pop it to him."

O'Brien hunts with a pack of Airedale dogs. He goes to a likely spot and the dogs do the rest. He has never been injured while bear hunting, hasn't even had an accident to his horse, and until a month ago never lost a dog. It is very seldom that he carries a revolver, because, as he exresses it. "a man can run faster when he's weighted down light!"
